

HB 5298

Hayley Quinn

2/20/13

To whom it may concern,

I am strongly opposed to involuntary electroshock. It should be illegal. Electroshock is a form of mutilation-it only destroys brain tissue leaving the person with brain damage. I have known many people in my lifetime who have received electroshock even numerous times and as a result, none of them can function normally. Their lives were ruined. Forced (involuntary) treatment is a crime and must be stopped! I sincerely hope this bill to ban forced electroshock is passed and signed into law.

Thank you for your attention.

Hayley Quinn
